

## **TG 454-S**

Visible and UV laser diodes in TO56 package

#### **Features:**

Optical output power: 50mW (Tcase=20°C)

Peak wavelength: 454+/- 2 nm @RT

Efficient radiation source for cw and pulsed operation

Single tranverse mode semiconductor laser

### Absolute maximum ratings

| Item                       | Symbol        | Absolute Maximum Ratings | Unit |  |
|----------------------------|---------------|--------------------------|------|--|
| Allowable Reverse Current  | $I_r$         | 1                        | [uA] |  |
| PD Reverse Voltage         | $V_r$         | 5                        | [V]  |  |
| Storage Temperature        | $T_{storage}$ | -10~85                   | [°C] |  |
| Operating Case Temperature | $T_C$         | 0~60*                    | [°C] |  |

#### **Electric/Optical Characteristics**

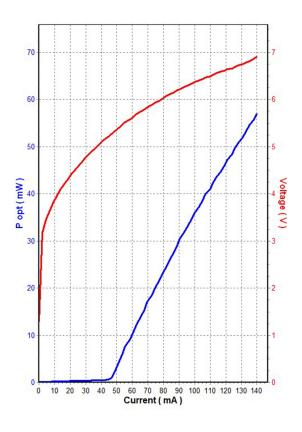

| Item                         | Condition            | Symbol        | Value    | Unit     |
|------------------------------|----------------------|---------------|----------|----------|
| Optical Output Power         | CW                   | $P_{O}$       | 50       | [mW]     |
| Peak Wavelength              | P <sub>O</sub> =50mW | $\lambda_{p}$ | 454 +/-2 | [nm]     |
| Threshold Current            | CW                   | $I_th$        | 40-80    | [mA]     |
| Operating Current            | P <sub>O</sub> =50mW | $I_{op}$      | 92-143   | [mA]     |
| Temperature wavelength shift | P <sub>O</sub> =50mW | DI            | 0.05     | [nm/deg] |
| Beam divergence - Fast axis  |                      |               | 32       | deg      |
| Beam divergence - Slow axis  |                      |               | 7        | deg      |

<sup>\*</sup>Please notice that the laser diode is designate to operate at room temperature (20 deg. C). The temperature increase leads to the shorter lifetime and lower output current.

### **Physical dimentions**

#### **Electrical connections**

Laser is connected to isolated pins "1" and "3". Pin "2" is connected with the case and not active.
