**Features**
- Shorter wavelength: 639nm Typ.
- High optical output power: 200mW
- Built in monitor PD
- Operating temperature: +60°C
- Small package: φ5.6mm
- Single transverse mode
- TE mode oscillation

**Application**
- Laser module
- Leveler
- Measurement
- Medical
- Light source of optical equipment
Absolute Maximum Ratings (Tc=25°C)

Note1) Operating temperature is defined by Case temperature "Tc". High increase in temperature of LD chip itself is expected during operation due to high current density. Thus, without proper heat dissipation, it is observed that no specific output power is achieved or it results to LD degradation. It is advised that sufficient measure of heat dissipation should be taken so that LD’s maximum operating temperature is not exceeded during actual operation.

Note2) The relation of optical output power vs operating temperature is based on the following figure.

Test Condition:
- Po=200mW, V_{R(PD)}=5V
Typical Characteristic Curves

1. Optical Output Power vs. Forward Current
   - Case temperature Tc (°C)
   - Forward current IF (mA)
   - Optical output power Po (mW)

2. Threshold current vs. Case Temperature
   - Case temperature Tc (°C)
   - Threshold current Ith (mA)

3. Slope Efficiency vs. Case Temperature
   - Case temperature Tc (°C)
   - Slope efficiency \( \eta_s \) (mW/mA)

4. Far Field Pattern
   - Angle \( \theta \) (°)
   - Relative intensity
   - Tc=25°C
   - Po=200mW

5. Lasing Wavelength vs. Case temperature
   - Case temperature Tc (°C)
   - Lasing wavelength \( \lambda_p \) (nm)
   - Po=200mW
   - Po=120mW

6. Monitor Current vs. Case Temperature
   - Case temperature Tc (°C)
   - Monitor current Is (mA)
   - VR(PD)=5V
   - Po=200mW
   - Po=120mW
Cautions

1. Ushio Inc. (Ushio) neither warrants nor grants licenses of any our lights or any third party’s patent, copyright, trademark, or other intellectual property rights for information contained in this document. Ushio bears no responsibility for problems that may arise with third party’s right, including intellectual property rights, in connection with use of the information contained in this document.

2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.

3. Ushio makes every attempt to ensure that its products are of high quality and reliability. However, contact our sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic safety equipment or medical equipment for life support.

4. Design your application so that the products is used within the ranges guaranteed by Ushio. particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Ushio bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Ushio product does not cause bodily injury, fire or other consequential damage due to operation of the Ushio product.

5. This product is not designed to be radiation resistant.

6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Ushio.

7. Contact our sales office for any questions regarding this document or Ushio products.

Important Notice

Performance figures, data and any illustrative material provided in this data sheet are typical and must be specifically confirmed in writing by Ushio before they become applicable to any particular order or contract. In accordance with the Ushio policy of continuous improvement specifications may change without notice. Further details are available from any Ushio sales representative.

Caution - use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
Disclaimer

Product specifications and data shown in this product catalog are subject to change without notice for the purposes of improving product performance, reliability, design, or otherwise.

Product data and parameters in this catalog are typical values based on reasonably up-to-date measurements.

Product data and parameters may vary by user application and over time.

Products shown in this catalog are intended to be used for general electronic equipment. Products are not guaranteed for applications where product malfunction or failure may cause personal injury or death, including but not limited to life-supporting / saving devices, medical devices, safety devices, airplanes, aerospace equipment, automobiles, traffic control systems, and nuclear reactor control systems.
