1. Composition

- Fiber Coupled Laser System

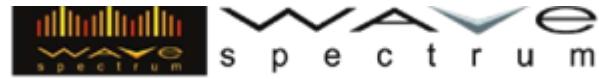

- Power Connecting Wire

Wavespectrum Laser, Inc.
www.wavespectrum-laser.com
wavespectrumlaser@gmail.com

- KEY

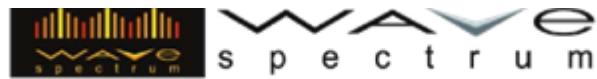

- INTERLOCK Connector

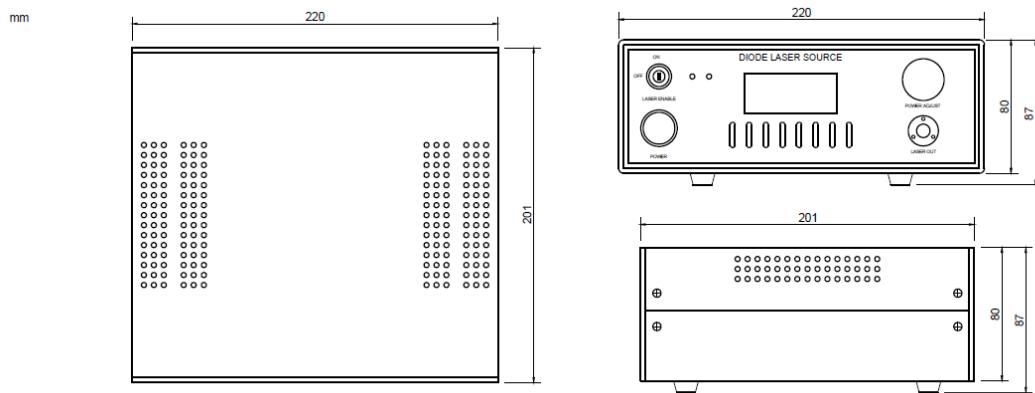

Wavespectrum Laser,Inc.
www.wavespectrum-laser.com
wavespectrumlaser@gmail.com

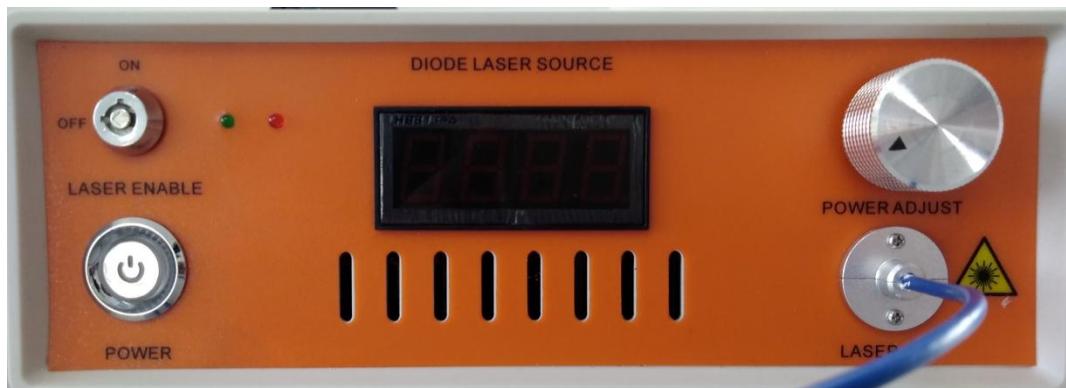

2. Dimension (Unit :mm)

220mm*201mm*87mm

3. Interface and button description

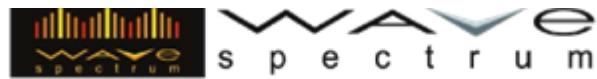

● Front Interface

- a) Laser Output (“LASER OUT”)
- b) Power Switch (“POWER”)
- c) Current Digital Display (unit:mA)
- d) Power Control (“POWER ADJUST”)
- e) Key Switch (“LASER ENABLE”)

Wavespectrum Laser,Inc.
www.wavespectrum-laser.com
wavespectrumlaser@gmail.com

f) Indicator light ("Power/Warning light")

- 1) When customers open the “POWER”, the Power indicator light(Green) will light up.**
- 2) If the laser system works abnormal, the warning light (Red) will light up, and the laser system will turn off laser power output.**

● **Back Interface**

a) AC Power Connector("AC CONNECTOR")

b) Fans

c) INTERLOCK

4. Install the Cable

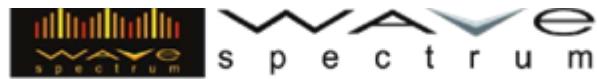

Install the power wire (90 V~220V AC Input).

5. How to work

a) Install the Power Wire to the System

Wavespectrum Laser,Inc.
www.wavespectrum-laser.com
wavespectrumlaser@gmail.com

-
- b) Connect the Power Wire to AC Power (90 V~220VAC)
 - c) Clean the Fiber Tips
 - d) Attach the INTERLOCK Connector
 - e) Open the Power Switch
 - f) Turn the " Key Switch" to ON
 - g) You can get the Laser (use the "Power Adjust" to adjust the output power)

6. Stop Work

- a) Adjust the operating current to a minimum
- b) Turn the" Key Switch" to OFF
- c) Close the Power Switch
- d) Take the INTERLOCK Connector down
- e) Clean the fiber tips and cover the protective cap

7. Need to pay Attention

Please clean the fiber tips before work it, otherwise the dust will burn the fiber.
